This tab is pretty accurate I think, just couldn't figure out how to notate the stutter thing. You don't necessarily have to use a boss dd6/dd whatever other ones have the hold function or masf raptio and you don't necessarily have to play the part yourself, you could put some kind of stuttery noise on a sample pad. Didn't tab the jam at the end because it's a jam and not really part of the song.
